St Edward's CE Primary School - Long Term Planning Sequence

Medium Term Plans include a detailed sequence of learning for each lesson – these are available from subject leaders

SCIENCE

Foundation Stage

During Foundation Stage, opportunities for the following are planned in:

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
- using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions

As part of the Early Years learning environment, there are many opportunities for science, particularly through the 'Understanding the World' area and also through wider opportunities in small world, construction, role play, water, sand, malleable play, sensory play, modelling and outdoor learning. These provide rich contexts to develop scientific literacy (reasoning) – asking questions that will develop children's thinking in the following areas:

Exploring the natural world around

Describing what they see, hear and feel whilst outside

Understanding the effect of changing seasons on the natural world around them

Children also have opportunity to use science vocabulary in their talk – introducing new technical/scientific words

Year 1

Key Skills (Working Scientifically - Year 1/2)

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
- using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions.

	T - •		
Year	Topic	National Curriculum Content	Key Knowledge and vocabulary
Year 1	Plants (Percy the Park Keeper)	 identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees 	Leaf, flower, blossom, petal, fruit, berry, root, seed, trunk, branch, stem, bark, stalk, bud Names of trees in the local area Names of garden and wild flowering plants in the local area Make close observations of leaves, seeds, flowers etc. Classify leaves, seeds, flowers etc. using a range of characteristics Identify plants by matching them to named images Make observations of how plants change over a period of time End Points: Understand that there is vast array of plants which all have specific names and that these can be identified by looking at the key characteristics of the plant. Be able to name some common plants and trees. Understand that plants have common parts and be able to name some. Know that some trees keep their leaves all year while other trees drop their leaves during autumn and grow them again during spring.
Year 1	Animals (On Safari)	 identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) 	Head, body, eyes, ears, mouth, teeth, leg, tail, wing, claw, fin, scales, feathers, fur, beak, paws, hooves Names of animals experienced first-hand from each vertebrate group Make first hand close observations of animals from each of the groups Compare two animals from the same or different group Classify animals using a range of features Identify animals by matching them to named images Classify animals according to what they eat End Points: Understand that animals vary in many ways and have different features. Can name some animals that belong to each group. Understand animals eat certain things and are carnivores, herbivores or omnivores. Know that humans and insects are not animals
Year 1	Humans (All about me)	identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense	Senses, touch, see, smell, taste, hear, fingers, skin, eyes, nose, ear and tongue Make first hand close observations of parts of the body e.g. hands, eyes Compare two people Take measurements of parts of their body Look for patterns between people e.g. Do people with big hands have big feet? Classify people according to their features Investigate human senses

			 End Points: know that humans and insects are animals Know that humans have 5 senses and can name them and the parts of the body linked to each sense.
Year 1	Everyday Materials (Chocolate)	 distinguish between an object and the material from which it is made identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety of everyday materials on the basis of their simple physical properties 	Object, material, wood, plastic, glass, metal, water, rock, brick, paper, fabric, elastic, foil, card/cardboard, rubber, wool, clay, hard, soft, stretchy, stiff, bendy, floppy, waterproof, absorbent, breaks/tears, rough, smooth, shiny, dull, see through, not see through Classify objects made of one material in different ways e.g. a group of object made of metal Classify in different ways one type of object made from a range of materials e.g. a collection of spoons made of different materials Classify materials based on their properties Test the properties of objects End Points: Understand the term material is what an object is made from. Know that all objects are made of one or more material. Can describe different materials by their properties e.g. shiny, stretchy, rough etc.
Year 1	Seasonal Change	observe changes across the four seasons observe and describe weather associated with the seasons and how day length varies	Weather (sunny, rainy, windy, snowy etc.), seasons (Winter, Summer, Spring, Autumn), sun, sunrise, sunset, day length Collect information about the weather regularly throughout the year Present this information in table and charts to compare the weather across the seasons Collect information, regularly throughout the year, of features that change with the seasons Gather data about day length regularly throughout the year and present this to compare the seasons End Points: Can name the four seasons and knows the weather changes in the seasons (e.g. colder and rainier in the winter and hotter and drier in the summer). Knows that a day is longer in the summer and shorter in the winter.
		Y	ear 2
Year 2	Animals including Humans (Growth and Survival)	 Notice that animals, including humans, have offspring which grow into adults Find out about and describe the basic needs of animals, including humans, for survival (water, food and air) Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. 	Animals including humans have offspring which grow into adults. In humans and some animals these offspring will be young, such as babies or kittens, that grow into adults. In other animals, such as chickens or insects, there may be eggs laid that hatch to young or other stages which then grow to adults. The young of some animals do not look like their parents e.g. tadpoles. All animals including humans have basic needs of feeding, drinking and breathing that must be satisfied in order to survive, and to grow into healthy adults they also need the right amounts and types of food and exercise. Good hygiene is also important in preventing infections and illnesses.

			Offspring, reproduction, growth, child, young/old stages (examples - chick/hen, baby/child/adult, caterpillar/butterfly), exercise, heartbeat, breathing, hygiene, germs, disease, food types (examples – meat, fish, vegetables, bread, rice, pasta)
			 End Points: Know that animals, including humans, have offspring which grow into adults and that young of some animals do not look like their parents (e.g. tadpoles). Understand that all animals, including humans, have basic needs in order to survive and be able to name them. Know exercise, good hygiene and food from different food groups are needed to be healthy and name some examples for each group.
Year 2	Plants	 Observe and describe how seeds and bulbs grow into mature plants Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. Identify and name a variety of plants and animals in their habitats, including micro-habitats 	light, shade, sun, warm, cool, water, grow, healthy Plants may grow from either seeds or bulbs. These then germinate and grow into seedlings which then continue to grow into mature plants. Seeds and bulbs need to be planted outside at particular times of the year and they will germinate and grow at different rates. Plants also need different amounts of water and space to grow well and stay healthy. End Points: Understand that plants may grow from either seeds or bulbs and that seeds and bulbs need to be planted outside at particular times of year and they will germinate and grow at different rates. Understand that some plants are better suited to growing in full sun and some grow better in partial or full shade. Plants also need different amounts of water and space to grow well and stay healthy.
Year 2	Uses of Everyday Materials	 Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	Names of materials – increased range from year 1 Properties of materials - as for year 1 plus opaque, transparent and translucent, reflective, non-reflective, flexible, rigid Shape, push/pushing, pull/puling, twist/twisting, squash/squashing. Bend/bending, stretch/stretching All objects are made of one or more materials that are chosen specifically because they have suitable properties for the task. A material can be suitable for different purposes and an object can be made of different materials. Objects made of some materials can be changed in shape by bending, stretching, squashing and twisting. Classify materials Make suggestions about alternative materials for a purpose that are both suitable and unsuitable

			Test the properties of materials for particular
			 End Points: Understand that objects are made from particular materials because of its properties and can give examples of an object and link the material it's made from and the object's use (eg. Plastic bottle – transparent so you can see the liquid inside it and waterproof). Understand that a material can be suitable for different purposes and an object can be made of different materials. Know that objects made of some materials can be changed in shape by bending, stretching, squashing and twisting.
Year 2	Living Things and their habitats	 Explore and compare the differences between things that are living, dead and things that have never been alive. Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other Identify and name a variety of plants and animals in their habitats, including micro-habitats Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. 	Living, dead, never been alive, suited, suitable, basic needs, food, food chain, shelter, move, feed, names of local habitats e.g. pond, woodland etc., names of micro-habitats e.g. under logs, in bushes etc. All objects are either living, dead or have never been alive. Animals and plants live in a habitat to which they are suited The habitat provides the basic needs of the animals and plants Within a habitat there are different micro-habitat that have different conditions The plants and animals in a habitat depend on each other for food and shelter etc. The way that animals obtain their food from plants and other animals can be shown in a food chain. End Points: • Understands that all objects are either living, dead or have never been alive and can
			 find or name examples of these. Understands that animals and plants live in habitats that they are suited to and that habitats provide the basic needs for the animal (eg. food, shelter, water). Also know that in habitats there are different microhabitats. Knows that a food chain shows how animals get their food and starts with a plant.

Year 3

Key Skills (Working Scientifically - Year 3/4)

- > asking relevant questions and using different types of scientific enquiries to answer them
- > setting up simple practical enquiries, comparative and fair tests
- > making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- pathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions

- > using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- > identifying differences, similarities or changes related to simple scientific ideas and processes
- > using straightforward scientific evidence to answer questions or to support their findings.

Year 3	Plants	 Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant Investigate the way in which water is transported within plants Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal 	Photosynthesis, pollen, insect/wind pollination, seed formation, seed dispersal – wind dispersal, animal dispersal, water dispersal Many plants have roots, stems/trunks, leaves and flowers/blossom. Pollen, which is produced by the male part of the flower, is transferred to the female part of other flowers (pollination). This forms seeds which are then dispersed in different ways. Different plants require different conditions for germination and growth Observe what happens to plants over time when the leaves or roots are removed Investigate what happens to plants when they are put in different conditions Spot flowers, seeds, berries and fruits outside throughout the year Observe flowers carefully to identify the pollen Observe flowers being visited by pollinators Observe seeds being blown from the trees Research different types of seed dispersal Classify seeds in a range of ways Create a new species of flowering plant End Points:
			 Knows the main parts of a plant and the function of each part Understands that some plants produce flowers which enable the plant to reproduce.
			Knows that different plants require different conditions for germination and growth.
Year 3	Rocks	 Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter. 	Rock, stone, pebble, boulder, grain, crystals, layers, hard, soft, texture, absorb water, soil, fossil, marble, chalk, granite, sandstone, slate, soil, peat, sandy/chalk/clay soil Rock is a naturally occurring material There are different types of rock which have different properties. Rocks can be different shapes and Soils are made up of pieces of ground down rock which may be mixed with plant and animal material The type of rock, size of rock piece and the amount of organic matter affect the property of the soil. Some rocks contain fossils. Observe rocks closely and classify Research using secondary sources how fossils are formed Observe soils closely and classify Research the work of Mary Anning End Points:
			Understand that rock is a naturally occurring material and there are different types of rock which have different properties and have different sizes of grain or crystal.

			Know that fossils were formed millions of years ago and can explain how fossils are formed.
Year 3	Light	 Recognise that they need light in order to see things and that dark is the absence of light Notice that light is reflected from surfaces Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by an opaque object Find patterns in the way that the size of shadows change 	Light, light source, dark, absence of light, transparent, translucent, opaque, shiny, matt, surface, shadow, reflect, mirror, sunlight, dangerous We see objects because our eyes can sense light. Dark is the absence of light. Some objects are sources of light. The light from the sun can damage our eyes and therefore we should not look directly at the Sun Shadows are formed on a surface when an opaque or translucent object is between a light source and the surface and blocks some of the light. The size of the shadow depends on the position of the source, object and surface.
			 End Points: Understand that we need light to see and that without any light at all we would not be able to see. To know that some objects are light sources (and be able to name some) but the moon is not a light source. To know that shadows are formed when an opaque or translucent object blocks some of the light and the size of the shadow depends on the position of the light source, object and surface.
Year 3	Forces and magnets	 Compare how things move on different surfaces Notice that some forces need contact between two objects, but magnetic forces can act at a distance Observe how magnets attract or repel each other and attract some materials and not others Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials Describe magnets as having two poles Predict whether two magnets will attract or repel each other, depending on which poles are facing 	Force, push, pull, twist, contact force, non-contact force, magnetic force, magnet, strength, bar magnet, ring magnet, button magnet, horseshoe magnet, attract, repel, magnetic material, metal, iron, steel, poles, north pole, south pole A force is a push or a pull. When an object moves on a surface, the texture of the surface and the object affect how it moves. It may help the object to move better or it may hinder its movement A magnet attracts magnetic material. Iron and nickel and other materials containing these are magnetic. The strongest parts of a magnet are the poles. Magnets have two poles – a north pole and a south pole. For some forces to act there must be contact Some forces can act at a distance. The magnet does not need to touch the object that it attracts. End Points: Understands that a force is a push or a pull and that the texture of a surface will affect how an object moves on it. Knows that a magnet attracts magnetic material and that the strongest parts of a
			 magnet are called poles. Know that magnets have two poles – a north pole and a south pole and that if two poles the same are brought together they will push away from each other – repel, and if two different poles are brought together they pull together – attract.

		• Understands that for some forces to act, there must be contact (e.g. the wind moving the trees) but some forces can act at a distance (e.g. magnetism - the magnet does not
		need to touch the object that it attracts).
Year 4		

Key Skills (Working Scientifically - Year 3/4)

- > asking relevant questions and using different types of scientific enquiries to answer them
- > setting up simple practical enquiries, comparative and fair tests
- > making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- > gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- > using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings.

Year 4	Living things and their	•	Recognise that living things can be grouped in a variety of ways	Classification, classification keys, environment, habitat, human impact, positive, negative, migrate, hibernate
	habitats		Explore and use classification keys to help group,	Living things can be grouped (classified) in different ways according to their features.
	liabitats	•	identify and name a variety of living things in their	Classification keys can be used to identify and name living things.
			local and wider environment	Living things live in a habitat which provides an environment to which they are suited
				These environments may change naturally. Humans also cause the environment to change.
		•	Recognise that environments can change and that this	These environments also change with the seasons
			can sometimes pose dangers to living things	Observe plants and animals in different habitats throughout the year
				Use classification keys to name unknown living things
				Classify living things found in different habitats based on their features
				Create a simple identification key based on observable features
				Use fieldwork to explore human impact on the local environment
				Use secondary sources to find out about how environments may naturally change and to
				find out about human impact, both positive and negative, on environments
				End Points:
				Know that living things can be grouped (classified) in different ways according to their
				features and use classification keys.
				Know that living things live in a habitat which provides an environment to which they
				are suited (Year 2 learning).
				Understand that environments may change naturally (e.g. from flooding) and that
				humans can also cause the environment to change: sometimes for good (setting up
				nature reserves) but sometimes not good (littering).
				Know that environments also change with the seasons and different living things can be
				found in a habitat at different times of the year.
Year 4	Animals	•	Identify that animals, including humans, need the	Nutrition, nutrients, carbohydrates, sugars, protein, vitamins, minerals, fibre, fat, water,
	including		right types and amount of nutrition, and that they	skeleton, bones, muscles, support, protect, move, skull, ribs, spine, muscles, joints
	humans			

(on plan document as Year 3)	cannot make their own food; they get nutrition from what they eat Identify that humans and some other animals have skeletons and muscles for support, protection and movement	Animals need to eat in order to get the nutrients they need. Food contains a range of different nutrients that are needed by the body to stay healthy Humans and some other animals have skeletons and muscles which help them move and provide protection and support. Classify food in a range of ways Use food labels to explore the nutritional content of a range of food items Use secondary sources to find out they types of food that contain the different nutrients Use food labels to answer enquiry Plan a daily diet contain a good balance of nutrients Explore the nutrients contained in fast food Use secondary sources to research the parts and functions of the skeleton
Year 4 Animals including humans	 Describe the simple functions of the basic parts of the digestive system in humans Identify the different types of teeth in humans and their simple functions Construct and interpret a variety of food chains, identifying producers, predators and prey 	Digestive system, digestion, mouth, teeth, saliva, oesophagus, stomach, small intestine, nutrients, large intestine, rectum, anus, teeth, incisor, canine, molar, premolars, herbivore, carnivore, omnivore, producer, predator, prey, food chain Food enters the body through the mouth. Digestion starts when the teeth start to break the food down. Saliva is added and the tongue rolls the food into a ball. The food is swallowed and passes down the oesophagus to the stomach. Here the food is broken down further by being churned around and other chemicals are added. The food passes into the small intestine. Here nutrients are removed from the food and leave the digestive system to be used elsewhere in the body. The rest of the food then passes into the large intestine. Here the water is removed for use elsewhere in the body. What is left is then stored in the rectum until it leaves the body through the anus Humans have four types of teeth Living things can be classified as producers, predators and prey according to their place in the food chain. Research the function of the parts of the digestive system Explore eating different types of food Classify animals as herbivores, carnivores or omnivores according to the type of teeth they have in their skulls Use food chains to identify producers, predators and prey within a habitat Use secondary sources to identify animals in a habitat and find out what they eat End Points: Animals/Animals including humans Knows the basic sequence of the digestive system and can say what happens at each part. Knows that humans have different types of teeth and be able to name some along with the job they do (e.g. incisors for cutting).

Pear 4 Electricity				Understands that living things can be classified as producers, predators and prey according to their place in the food chain and name some within a habitat.
using wires and if there is a break in the circuit it will not work. Can make and name the components in a circuit Knows the difference between conductors and insulators and give examples of each. Sound Identify how sounds are made, associating some of them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the vibrations Recognise that sounds get fainter as the distance from the sound source increases Using wires and if there is a break in the circuit it will not work. Can make and name the components in a circuit Knows the difference between conductors and insulators and give examples of each. Sound, source, vibrate, vibration, travel, pitch (high, low), volume, faint, loud, insulation A sound source produces vibrations which travel through a medium from the source to or ears. Different mediums can carry sound but sound cannot travel through a vacuum The vibrations cause parts of our body inside our ears to vibrate, allowing us to hear (sens the sound. The loudness (volume) of the sound depends on the strength (size) of vibrations Pitch is thighness or lowness of a sound and is affected by features of objects producing the sound Classify sound sources Explore making sounds with a range of objects Explore using objects that change in feature to change pitch and volume Measure sounds over different distances	Year 4	Electricity	 Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit Recognise some common conductors and insulators, 	Electricity, electrical appliance/device, mains, plug, electrical circuit, complete circuit, component, cell, battery, positive, negative, connect/connections, loose connection, short circuit, crocodile clip, bulb, switch, buzzer, motor, conductor, insulator, metal, non-metal, symbol Many household devices and appliances run on electricity. An electrical circuit consists of a cell or battery connected to a component using wires. If there is a break in the circuit, a loose connection or a short circuit the component will not work. A switch can be added to the circuit to turn the component on and off. Metals are good conductors so they can be used as wires in a circuit. Non-metallic solids are insulators except for graphite (pencil lead). Water, if not completely pure, also conducts electricity Construct a range of circuits Explore how to connect a range of different switches and investigate how they function in different ways Apply their knowledge of conductors and insulators to design and make different types of switch Make circuits that can be controlled as part of a D&T project End Points:
Year 4 Sound Identify how sounds are made, associating some of them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the vibrations Recognise that sounds get fainter as the distance from the sound source increases Recognise that sounds get fainter as the distance from the sound source increases Resound source, vibrate, vibration, travel, pitch (high, low), volume, faint, loud, insulation. A sound source produces vibration, travel, pitch (high, low), volume, faint, loud, insulation. A sound source produces vibration, travel, pitch (high, low), volume, faint, loud, insulation. A sound source produces vibration, travel, pitch (high, low), volume, faint, loud, insulation. A sound source produces vibration, travel, pitch (high, low), volume, faint, loud, insulation. A sound source produces vibrations which travel through a medium from the source to or ears. Different mediums can carry sound but sound cannot travel through a wacuum The vibrations cause parts of our body inside our ears to vibrate, allowing us to hear (sens the sound. The loudness (volume) of the sound depends on the strength (size) of vibrations Pitch is the sound. Classify sound sources Explore making sounds with a range of objects Explore using objects that change in feature to change pitch and volume Measure sounds over different distances				using wires and if there is a break in the circuit it will not work. • Can make and name the components in a circuit
End Points:	Year 4	Sound	 them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the vibrations Recognise that sounds get fainter as the distance 	Sound, source, vibrate, vibration, travel, pitch (high, low), volume, faint, loud, insulation A sound source produces vibrations which travel through a medium from the source to our ears. Different mediums can carry sound but sound cannot travel through a vacuum The vibrations cause parts of our body inside our ears to vibrate, allowing us to hear (sense) the sound. The loudness (volume) of the sound depends on the strength (size) of vibrations Pitch is the highness or lowness of a sound and is affected by features of objects producing the sounds. Classify sound sources Explore making sounds with a range of objects Explore using objects that change in feature to change pitch and volume Measure sounds over different distances Measure sounds through different insulation materials

	Knows that sound produces vibrations which travel through a medium from the source
	to our ears.
	 Knows that different mediums such as solids, liquids and gases can carry sound, but
	sound cannot travel through a vacuum (an area empty of matter).
1	 Knows that the loudness (volume) of the sound depends on the strength (size) of

- Knows that the loudness (volume) of the sound depends on the strength (size) of vibrations which decreases as they travel through the medium. Therefore, sounds decrease in volume as you move away from the source.
- Knows that Pitch is the highness or lowness of a sound and is affected by features of objects producing the sounds. For example, smaller objects usually produce higher pitched sounds.

force and that Pulleys, levers and gears are all mechanisms, also known as simple

Year 5

Key Skills (Working Scientifically - Year 5/6)

- planning different types of scientific enquiries to answer questions
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- recording data and results of increasing complexity using scientific diagrams and graphs
- > using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships
- identifying scientific evidence that has been used to support or refute ideas or arguments.

/ luellul	ying scientific evic	defice that has been used to support of refute ideas of arguin	ents.
Year 5	Forces	Explain that unsupported objects fall towards the Earth because of the force of gravity acting between	Force, gravity, Earth, air resistance, water resistance, friction, mechanisms, simple machines, levers, pulleys, gears
		the Earth and the falling object	A force causes an object to start moving, stop moving, speed up, slow down or change
		Identify the effects of air resistance, water resistance	direction.
		and friction, that act between moving surfaces	Gravity is a force that acts at a distance.
		Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a	Air resistance, water resistance and friction are contact forces that act between moving surfaces.
		greater effect	A mechanism is a device that allows a small force to be increased to a larger force. Pulleys, levers and gears are all mechanisms, also known as simple machines.
			Investigate the effect of friction, water resistance and air resistance in a range of contexts Explore how levers, pulleys and gears work
			Create a timer that uses gravity to move a ball
			Research how the work of scientists such as Galileo Galilei and Isaac Newton helped to
			develop the theory of gravitation
			End Points:
			 Know that a force causes an object to start moving, stop moving, speed up, slow down or change direction: Know about gravity and its impact on our lives
			Know that air resistance, water resistance and friction are contact forces that act between moving surfaces and know the effect of these forces.
			Know that a mechanism is a device that allows a small force to be increased to a larger

machines.

Year 5 (on Plan document as Year 4)	States of matter	 Compare and group materials together, according to whether they are solids, liquids or gases Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature 	Solid, liquid, gas, state change, melting, freezing, melting point, boiling point, evaporation, temperature, water cycle A solid keeps its shape and has a fixed volume. A liquid has a fixed volume but changes in shape to fit the container. A gas fills all available space; it has no fixed shape or volume. Melting is a state change from solid to liquid. Freezing is a state change from liquid to solid. Boiling is a change of state from liquid to gas Evaporation is the same state change as boiling Condensation is the change back from a gas to a liquid caused by cooling. Understanding precipitation and the water cycle Observe closely and classify a range of solids and liquids Explore making gases visible and showing their effect Classify materials according to whether they are solids, liquids and gases Observe a range of materials melting Investigating melting point of different Explore freezing different liquids Use a thermometer to measure temperatures Observe water evaporating Set up investigations to explore changing the rate of evaporation Use secondary sources to find out about the water cycle End Points: Understands and can name the properties of solids, liquids and gases. Knows about how materials change state and know the temperature at which materials change state (boiling at 100°C and freezing at 0°C) Know about the water cycle and can explain evaporation and condensation (evaporation is the same state change as boiling, but slower and condensation is the
Year 5	Properties and changes of materials	 Compare and group together everyday materials on the basis of their properties Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution Use knowledge of solids, liquids and gases to decide how mixtures might be separated Give reasons, based on evidence, for the particular uses of everyday materials, including metals, wood and plastic Demonstrate that dissolving, mixing and changes of state are reversible changes 	change back from a gas to a liquid caused by cooling). Thermal/electrical insulator/conductor, change of state, mixture, dissolve, solution, soluble, insoluble, filter, sieve reversible/non-reversible change, burning, rusting, new material Materials have different uses depending on their properties and state Properties include hardness, transparency, electrical and thermal conductivity and attraction to magnets. Some materials will dissolve in a liquid and form a solution while others are insoluble and form sediment. Mixtures can be separated by filtering, sieving and evaporation. Some changes to materials are reversible and other are non-reversible Investigate the properties of different materials in order to recommend materials for particular Explore adding a range of solids to water and other liquids

		Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible	Investigate rates of dissolving by carrying out comparative and fair test Separate mixtures by sieving, filtering and evaporation Explore a range of non-reversible changes Carry out comparative and fair tests involving non-reversible changes End Points: Understands the properties of materials and use this to explain everyday uses of materials and can group them. Knows and can explain what dissolving means, and give examples of materials that dissolve. Uses their knowledge of liquids, gases and solids to suggest how materials can be recovered from solutions or mixtures (by evaporation, filtering or sieving) and can name equipment used for this. Understands and can describe some simple reversible and non-reversible changes to materials and give examples.
Year 5	Earth and space	 Describe the movement of the Earth, and other planets, relative to the Sun in the solar system Describe the movement of the Moon relative to the Earth Describe the Sun, Earth and Moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky 	Earth, Sun, Moon, (Mercury, Jupiter, Saturn, Venus, Mars, Uranus, Neptune) spherical, solar system, rotates, star, orbit, planets The Sun is a star. It is at the centre of our solar system. There are 8 planets These travel around the Sun in fixed orbits. Earth takes 365¼ days to complete its orbit around the Sun. The Earth rotates on its axis every 24 hours. As Earth rotates half faces the Sun (here it is
Year 5	Living things and their habitats	Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird	Life cycle, reproduce, sexual, sperm, fertilises, egg, live young, metamorphosis, asexual, plantlets, runners, bulbs, cuttings As part of their life cycle plants and animals reproduce.

		Describe the life process of reproduction in some	Most animals reproduce sexually.	
		plants and animals	Some young undergo a further change before becoming adults This is called a	
			metamorphosis.	
			Plants reproduce both sexually and asexually. Bulbs, tubers, runners and plantlets are	
			examples of asexual plant reproduction which involves only one parent.	
			Sexual reproduction occurs through pollination, usually involving wind or insects.	
			Use secondary sources and, where possible, first hand observations to find out about the life cycle of a range of animals	
			Compare the gestation times for mammals and look for patterns	
			Look for patterns between the size of an animal and its expected life span	
			Grow and observe plants that reproduce asexually	
			Take cuttings from a range of plants	
			Plant bulbs and then harvest to see how they multiply	
			Use secondary sources to find out about pollination	
			End Points:	
			 Understands and can explain the life cycle of a range of animals and be able to identify similarities and differences between the life cycles. 	
			 Knows and can name the key parts of a plant/flower and the roles they play 	
			 Understands and can explain the difference between sexual and asexual reproduction 	
			and give examples of how plants reproduce in both ways.	
Year 5	Animals	Describe the changes as humans develop to old age	Puberty: the vocabulary to describe sexual characteristics	
	including	(This builds on the learning in living things and their	When babies are young they grow rapidly.	
	humans	habitats)	They are very dependent on their parents. As they develop they learn many skills.	
			At puberty, a child's body changes and develops primary and secondary sexual	
		Taught alongside PSHE/RSE	characteristics. This enables the adult to reproduce.	
			Voor 6	
	Year 6			

Key Skills (Working Scientifically - Year 5/6)

- > planning different types of scientific enquiries to answer questions
- > taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- > recording data and results of increasing complexity using scientific diagrams and graphs
- > using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships
- identifying scientific evidence that has been used to support or refute ideas or arguments.

Year 6	Animals	 Describe the changes as humans develop to old age 	Puberty: the vocabulary to describe sexual characteristics	
	including		When babies are young they grow rapidly.	
	humans – Sex	Taught alongside PSHE/RSE	They are very dependent on their parents. As they develop they learn many skills.	
	&Relationship		At puberty, a child's body changes and develops primary and secondary sexual	
			characteristics. This enables the adult to reproduce.	

	Education (SRE)		
Year 6	Living Things and Their Habitats	 Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals Give reasons for classifying plants and animals based on specific characteristics. 	Vertebrates, fish, amphibians, reptiles, birds, mammals, invertebrates, insects, spiders, snails, worms, flowering and non-flowering Living things can be formally grouped according to characteristics. Plants and animals are two main groups but there are other livings things that do not fit into these groups Plants can make their own food whereas animals cannot. Animals can be divided into two main groups – those that have backbones (vertebrates) and those that do not (invertebrates). Vertebrates can be divided into five small groups – fish, amphibians, reptiles, birds and mammals. Each group has common characteristics. Invertebrates can be divided into a number of groups including insects, spiders, snails and worms. Plants can be divided broadly into two main groups – flowering plants and non-flowering plants. Use secondary sources to learn about the formal classification system devised by Carl Linnaeus and why it is important Use first hand observation to identify characteristics shared by the animals in a group Use secondary sources to research the characteristics of animals that belong to a group Use information about the characteristics of an unknown animal or plant to assign it to a group Classify plants and animals presenting this in a range of ways Create an imaginary animal which has features from one or more groups End Points: • Know that Living things can be grouped according to characteristics and understand that Plants and animals are two main groups but there are other livings things that do not fit into these groups e.g. micro-organisms. • Know that animals can be divided into two main groups (vertebrates and invertebrates) and that these can then be divided again into other groups. • Know that plants can be divided into two main groups (flowering and non-flowering plants) and that plants can make their own food but animals cannot. • Be able to give examples of different living things in these groups and explain reasons for classifying plants and animals in a specific way.
Year 6	Animals Including Humans	 Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function Describe the ways in which nutrients and water are transported within animals, including humans. 	Heart, pulse, rate, pumps, blood, blood vessels, transported, lungs, oxygen, carbon dioxide, nutrients, water, muscles, cycle, circulatory system, diet, exercise, drugs and lifestyle The heart pumps blood in the blood vessels around to the lungs. Oxygen goes into the blood and carbon dioxide is removed. The blood goes back to the heart and is then pumped around the body.

Year 6	Evolution and Inheritance	 Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution. 	Nutrients, water and oxygen are transported in the blood to the muscles and other parts of the body where they are needed. As they are used they produce carbon dioxide and other waste products. Carbon dioxide is carried by the blood back to the heart and then the cycle starts again as it is transported back to the lungs to be removed from the body. This is the human circulatory system. Diet, exercise, drugs and lifestyle have an impact on the way our bodies function. Some conditions are caused by deficiencies in our diet Carry out a range of pulse rate investigations Learn about the impact of exercise, diet, drugs and lifestyle on the body. This is likely to be taught through direct instruction due to its sensitive nature End Points: Be able to explain how the human circulatory system works, naming the main parts and their functions. Know and be able to explain how diet, exercise, drugs and lifestyle impacts on how the body functions. Know and can explain how water and nutrients are transported in animals, including humans. Offspring, sexual reproduction, vary, characteristics, suited, adapted, environment, inherited, species, fossils All living things have offspring of the same kind, as features in the offspring are inherited from the parents. Due to sexual reproduction, the offspring are not identical to their parents and vary from each other. Plants and animals have characteristics that make them suited (adapted) to their environment and will die, if the environment changes rapidly some variations of a species may not suit the new environment and will die, if the environment changes slowly, animals and plants with variations that are best suited survive in greater numbers to reproduce and pass their characteristics on to their young. Over time these inherited characteristics become more dominant within the population. Over a very long period of time these characteristics may be so different to how they were originally that a new species is created. This is evolution. Fossils give us evidence of w
--------	---------------------------	--	--

			 Understands and can explain how different plants and animals are suited (adapted) to their environments and link adaptation over time to evolution. Give examples of living things that lived millions of years ago and the fossil evidence we have to support this. Understands reproduction and offspring, recognising that offspring vary and are not identical to their parents.
Year 6	Light	 Recognise that light appears to travel in straight lines Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them. 	Light source, absence of light, transparent, translucent, opaque, shiny, matt, surface, reflect, mirror, straight lines, light rays. Light appears to travel in straight lines and we see objects when light from them goes into our eyes. The light may come directly from light sources but for other objects some light must be reflected from the object into our eyes for the object to be seen. Objects that block light (are not fully transparent) will cause shadows. Because light travels in straight lines the shape of the shadow will be the same as the outline shape of the object. Explore different ways to demonstrate that light travels in straight Explore the uses of the behaviour of light, reflection and shadows such as in periscope design, rear view mirrors and shadow puppets.
			 End Points: Understands and can describe how light travels, in straight lines, from a light source to our eyes or reflected from other objects into our eyes. Understands and can explain how light travels in straight lines past translucent or opaque objects to form a shadow of the same shape and understands how and why shadows change size.
Year 6	Electricity	 Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Use recognised symbols when representing a simple circuit in a diagram. 	Circuit, complete circuit, circuit diagram, circuit symbol, cell, battery, bulb, buzzer, motor, switch, voltage Adding more cells to a complete circuit will make a bulb brighter, a motor spin faster or a buzzer make a louder sound. If you use a battery with a higher voltage, the same thing happens. Adding more bulbs to a circuit will make each bulb less bright. Using more motors or buzzers, each motor will spin more slowly and each buzzer will be quieter. Turning a switch off (open) breaks a circuit so the circuit is not complete and electricity cannot flow. Any bulbs, motors or buzzers will then turn off as well. You can use recognised circuit symbols to draw simple circuit diagrams. Explain how a circuit operates to achieve particular operations, such as control the light for a torch with varying brightness or make a motor go faster or slower Make circuits to solve particular Carry out fair tests exploring changes in circuits Make circuits that can be controlled as part of a D&T project
			End Points:

	Be able to make electric circuits and knows how the number and voltage of cells within a circuit links to the brightness of a light or the volume of a buzzer.
	Be able to compare and give reasons why components work and do not work in a
	circuit.
	Be able to use recognised circuit symbols to draw simple circuit diagrams.

HISTORY

Foundation Stage

During Foundation Stage, opportunities for the following are planned in:

- a) Talking about members of their immediate family and community During dedicated talk time, listen to what children say about their family; share information about your own family, giving children time to ask questions or make comments; encourage children to share pictures of their family and listen to what they say about the pictures. Using examples from real life and from books, show children how there are many different families.
- b) Name and describe people who are familiar to them Talk about people that the children may have come across within their community, such as the police, the fire service, doctors and teachers. Listen to what children say about their own experiences with people who are familiar to them.
- c) Comment on images of familiar situations in the past Present children with pictures, stories, artefacts and accounts from the past, explaining similarities and differences. Offer hands-on experiences that deepen children's understanding, such as visiting a local area that has historical importance. Show images of familiar situations in the past, such as homes, schools, and transport. Look for opportunities to observe children talking about experiences that are familiar to them and how these may have differed in the past. Offer opportunities for children to begin to organise events using basic chronology, recognising that things happened before they were born.
- d) Compare and contrast characters from stories including figures from the past Frequently share texts, images, and tell oral stories that help children begin to develop an understanding of the past and present. Feature fictional and non-fictional characters from a range of cultures and times in storytelling, listen to what children say about them. Draw out common themes from stories, such as bravery, difficult choices and kindness, and talk about children's experiences with these themes. In addition to storytelling, introduce characters, including those from the past, using songs, poems, puppets, role play and other storytelling methods.

As part of the Early Years learning environment, there are many opportunities for history, particularly through the 'Understanding the World' area which includes looking at 'past and present' and also through wider opportunities in small world, role play, story and outdoor learning. These provide rich contexts to develop early historical skills – asking questions that will develop children's thinking and using history vocabulary in their talk.

	Topic	What the children are taught	NC Content Skills and Knowledge See medium term plans for these skills broken down into year groups	Key History Vocabulary taught (see MTP for specific vocabulary content)
Year 1	Year 1 All about me		Develop an awareness of the past	

Year 2	Life in London The Great Fire of London Explorers	 changes within living memory (history of grandparents) the lives of significant individuals in the past who have contributed to national and international achievements (Richard III, Queen Elizabeth II, Dr Barnardo, Florence Nightingale, Samuel Pepys, Roald Amundsen, Neil Armstrong) significant historical events, people and places in their own locality events beyond living memory that are significant nationally (Great Fire of London) 	 Use common words and phrases relating to the passing of time (see next column) Understand where the people and events they are studying fit into a chronological framework Identify similarities and differences Ask and answer questions Understand how we find out about the past End Points Year 1: Use common words and phrases relating to the passing of time Be able to state how times have changed between now and Victorian times End Points Year 2: Be able to recount relevant facts from The Great Fire of London To know that Roald Amundsen and Neil Armstrong contributed to international achievements 	A long time ago, same/different, change, people, lives, Past, now, modern, old, new History, significant, timeline, order, compare, similar, different, fact, opinion, artefact, event, source, evidence, changes, invention, question, cause, consequences, reason, connections, century, decade, living memory, periods of time
Year 3	Changes in Britain from the Stone Age to Iron Age The Roman Empire and its impact on Britain Britain settlement by Anglo-Saxon and Scots Viking and Anglo-Saxon Struggle for the kingdom of England to the time of Edward the confessor. A local History study (Castle Donington) A study of Greek life and achievements and their influence on the western world (Ancient Greece)	 Develop a chronologically secure knowledge and understanding of British, local and world history Note connections, contrasts and trends over time Address and devise historically valid questions about change, cause, similarity, difference and significance Construct informed responses that involve thoughtful selection and organisation of relevant information Understand that knowledge of the past comes from a range of sources 	 Develop a chronologically secure knowledge and understanding of British, local and world history They should note connections, contrasts and trends over time and develop the appropriate use of historical terms They should regularly address and sometimes devise historically valid questions about change, cause, similarity and difference, and significance. They should construct informed responses that involve thoughtful selection and organisation of relevant historical information. They should understand how our knowledge of the past is constructed from a range of sources End Points Year 3: Understand that items found in the past between Stone Age and Iron Age are helping us to build accurate pictures of how people lived To give some examples of what impact the Roman Empire had on Britain To recognise different time periods that exist between different groups invading Britain 	Chronological, Millennium, BC/BCE, AD/CE, era, similarities, differences, Prehistoric, primary, secondary sources, ancient, modern, archaeology, archaeologist, contrasts, trends over time, influence, significant, impact

			End Points Year 4:	
			 To articulate how the Greeks have influenced the Western world To communicate their understanding of the history of Castle Donington 	
Year 5	A study on the achievements of the earliest civilizations – Ancient Egyptians	 Develop a chronologically secure knowledge and understanding of British, local and world history Note connections, contrasts and trends over time Address and devise historically valid questions about change, 	 Develop a chronologically secure knowledge and understanding of British, local and world history They should note connections, contrasts and trends over time and develop the appropriate use of historical terms They should regularly address and sometimes devise historically valid questions about change, cause, similarity and difference, and significance. 	Cause and effect, propaganda, bias, society, Empire, point of view, objectivity, subjectivity, consequences, legacy, Modern British Values, laws
Year 6	A study of an aspect or theme in British history that extends pupils' chronological knowledge beyond 1066 (Life in Britain leading up to, during and after The Second World War) A study of a Non-European society - Benin	cause, similarity, difference and significance Construct informed responses that involve thoughtful selection and organisation of relevant information Understand that knowledge of the past comes from a range of sources	 They should construct informed responses that involve thoughtful selection and organisation of relevant historical information. They should understand how our knowledge of the past is constructed from a range of sources End Points Year 5: To identify the achievements of the Ancient Egyptians and their importance in history End Points Year 6: To name key events leading from the First WW to Second WW and their impact on British history To describe the key facts about Benin history and how this contrasts with the British history they have covered 	

GEOGRAPHY

Foundation Stage

As part of the Early Years learning environment, there are many opportunities for geography, particularly through the 'Knowledge and Understanding the World' area which includes looking a sense of place: Observing, finding out about, and identifying features in the places they live and in the natural world. Finding out about their environment, and talking about those features they like and dislike. Drawing information from a simple map.

Exploration and investigation - Looking closely at similarities, differences, patterns and change. Asking questions about why things happen and how things work. Recognising some environments that are different from the one in which they live.

Children will explore these concepts through small world, construction, role play, water, sand, malleable play, sensory play, modelling and outdoor learning. These provide rich contexts to develop geography literacy – asking questions that will develop children's thinking and using geographical vocabulary in their talk.

	Topic	What the children are taught	NC Content Skills and Knowledge	Vocabulary taught
			See medium term plans for these	
			skills broken down into year groups	
Year 1	Around and About	Locational knowledge	Develop knowledge about the	Human: City, town, village,
		Name and locate the world's seven continents and five	world, the United Kingdom and	factory, farm, house, office, port,
	Chocolate	oceans (both years)	their locality	harbour, shop, capital city,
		Name, locate and identify characteristics of the 4	Understand basic geographical	country
	Life in London	countries and capital cities of the UK and its surrounding	vocabulary both human and	
	_	seas (both years)	physical	Physical: beach, cliff, coast,
	Safari	Place knowledge	Use first hand observation and	forest, hill, mountain, sea, ocean,
		Understand geographical similarities and differences	geographical skills to enhance	river, soil, valley, vegetation,
	Percy the Park Keeper	through studying the human and physical geography of a	local awareness	season, weather, marine
		small area of UK (Year 1) and of a small area in a		
	Ongoing work/discussion	contrasting non-European country (Year 2)	End Points Year 1:	Map and fieldwork: Asia, Africa,
	about seasons		Can they say what they like about	North America, South America,
		Human and Physical Geography	their locality?	Antarctica,
		Identify seasonal and daily weather patterns in the UK	Can they identify the four	Australia/Oceania/Australasia,
		and the location of hot and cold areas of the world in	countries making up the United	Europe, Arctic, Southern, Pacific,
V	Climate and countries	relation to the Equator and the North and South Poles	Kingdom? Can they name some of the main	Atlantic, Indian
Year 2	Climate and countries	(both years)	towns and cities in the United	England, Scotland, Wales,
		Use geographical vocabulary to refer to key physical and	Kingdom?	N.Ireland, Belfast, Edinburgh,
		human features. (both years – see column opposite)	Can they explain the main	London, Cardiff,
	Islands and Explorers	Geographical skills and fieldwork	features of a hot and cold place?	North/Irish/Celtic Seas, English
	isianus anu Explorers	Use simple fieldwork and observational skills to study the	Can they point out where the	Channel

		(Year 1)	pore are on a groupe or action.	compass points (NSEW),
		Use world maps, atlases and globes to identify the UK and its countries, as well as the sountries, continents and	End Points Year 2:	fieldwork, plan, aerial
		and its countries, as well as the countries, continents and oceans studied at this key stage.	Can they name the capital cities of	photograph, map key symbols,
		Use simple compass directions and locational and	England, Wales, Scotland and N.	Equator, hot/cold, direction, key,
		directional language to describe the geography of their	Ireland?	continent, globe, atlas, address,
		school and its grounds and the key human and physical	Can they find where they live on a	right/left, patterns,
		features of its surrounding area (Year 1, compass	map of the UK? Can they describe	characteristics, surrounding seas
	1	directions again in Year 2)	the key physical features of a	_
	1	Use aerial photographs and plan perspectives to	place using words like beach,	
	1	recognise landmarks and basic human and physical	coast, forest, hill, mountain,	
	1	recognise landinarks and basic numan and physical	ocean, valley?	
			Can they name the continents of	

		features; devise a simple map; and use and construct basic symbols in a key (Year 2)	>	the world and find them in an atlas? Can they name the world's oceans and find them in an atlas?	
Year 4	Romans Anglo-Saxons and the Vikings Contrasting Location Study - Castleton	Locational knowledge Locate the world's countries, using maps to focus on Europe (including the location of Russia) Year 3 Locate the world's countries, using maps to focus on North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities - Year 5 Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time - Year 3 Identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night) Year 5/6 Place knowledge Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom - Year 4 Understand geographical similarities and differences through the study of human and physical geography of a region in a European country - Year 6 Understand geographical similarities and differences through the study of human and physical geography of a region within North or South America (Year 5) Human and Physical Geography Describe and understand key aspects of: physical geography, including: climate zones, biomes	A A A A A A	Extend knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America including the location and characteristics of a range of the world's most significant human and physical features. Develop the use of geographical knowledge, understanding and skills to enhance their locational and place knowledge. d Points Year 3: To name and locate well-known countries and cities in Europe. To use an 8-point compass correctly. To name up to six cities in the UK. To name up to six counties in the UK. To describe how volcanoes are created. To describe how earthquakes are created. d Points Year 4: Compare and contrast geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom (Castleton) Human geography, including:	Human: urban, region, Europe, Country, county, economy, trade, energy Physical: landscape, hills and mountains (and UK names e,g, Grampians) Coast, rural, climate, erosion, deposition, earthquake, volcano, water cycle, geology, minerals and rock types, Tundra, coniferous, deciduous, Mediterranean, mountainous, desert Map and fieldwork: observe, measure, record, environmental, region, compass points, ordancae survey map, scale, 4 figure grid, reference, contours, symbols, minerals, rocks Other: globally significant, land use, mountains, river features, equator, hemisphere, food chain, condensation, evaporation, change/effect
		and vegetation belts (Year 5), rivers (Year 5) mountains, volcanoes (Year 3) and earthquakes (Year 3), and the water cycle (Year 5)		types of settlement and land use, economic activity including trade links, and the distribution of	

		 human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water (Year 4) Geographical skills and fieldwork Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied Use the eight points of a compass, four and six-figure 	A	natural resources including energy, food, minerals and water Use four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider worlds	
Year 5	Rainforests	grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world (Year 4) Use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.	•	Extend knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America including the location and characteristics of a range of the world's most significant human and physical features. Develop the use of geographical knowledge, understanding and	Human: trade, deforestation, derelict, economy Physical: Tributary, confluence, meander, ox bow estuary, mouth source, biomes, climate zones Map and fieldwork: GIS – geographical information systems, global warming, latitude, longitude, north/south
Year 6	A study to compare a region in UK with a European country (France)		Enc >	skills to enhance their locational and place knowledge. d Points Year 5: Can they explain how the water cycle works?	hemisphere, tropics of Capricorn and Cancer, time differences
	Adventure		\ \ \	Can they explain why people are attracted to live by rivers? Can they name and locate many of the world's major rivers on maps? Can they locate and name the main countries in South America on a world map and atlas? d Points Year 6: Describe geographical similarities and differences through the study of human and physical geography of a region in France	

ART AND DESIGN

Foundation Stage

During Foundation Stage, opportunities for the following are planned in:

As part of the Early Years learning environment, there are many opportunities for art and design:

Exploring and Using Media and Materials - This is about how children experiment with media and materials finding out about their properties and modifying and manipulating them. It includes exploring patterns, media and different tools and techniques. Helping children to be creative is as much about encouraging attitudes of curiosity and questioning as about skills or techniques. Children notice everything and closely observe the most ordinary things that adults often take for granted. Building on children's interests can lead to them creating amazing inventions or making marks on paper that represent for them an experience or something they have seen. Encouraging children to choose and use materials and resources in an open-ended way helps them to make choices and to have confidence in their own ideas.

As part of the Early Years learning environment, there are many opportunities for art and design, particularly through the 'Expressive Arts' area and also through wider opportunities in small world, construction, sand, malleable play, sensory play, modelling and outdoor learning. These provide rich contexts to develop art and design.

	Skill Development	What the children are taught	NC Aims
Year 1	Painting	Painting a rainbow - Painting Mix primary colours and shades using different types of paint.	 Produce creative work, exploring ideas and recording experiences Be proficient in drawing, painting, sculpture and other art, craft and design
	Drawing	 Christmas Decoration – Textiles Learn the technique of weaving using a variety of 	Evaluate and analyse creative works using the language of art, craft and design
	Textiles	media • Learn basic running stitch to join fabric African Prints - Printing	 Know about the great artists, craft makers and designers, and understand the historical and cultural development of their art forms
	Printing	 Make marks in print with a variety of objects Build a repeating pattern and recognise pattern in the environment. Batik - Textiles	
	Textiles	 Be confident with printing on fabric. <u>Drawing Sunflowers - Drawing</u> Use a variety of tools, e.g. pencils, rubbers, crayons, pastels, felt tips, charcoal, ballpoints, chalk and other dry media. <u>Leaf Rubbings - Printing</u> Make rubbings. 	
Year 2	Drawing	 Henri Rousseau – Drawing and Painting Draw for a sustained period of time from the figure and real objects, including single and grouped objects. 	
	Painting	Mix a range of secondary colours, shades and tones.	

Mix and match colours to artefacts and objects. 3D Form Great Fire of London - Drawing and Painting Layer different media, e.g. crayons, pastels, felt tips, charcoal and ballpoint. Mix a range of secondary colours, shades and tones. Experiment with tools and techniques, e.g. layering, mixing media, scraping etc. • Work on a range of scales e.g. large brush on large paper etc. Insect Sculpture - 3D Form Manipulate clay Experiment with, construct and join natural materials more confidently. Year 3 Drawing Vincent Van Gogh – Drawing Produce creative work, exploring ideas and recording experiences Experiment with different grades of pencil and other implements. Be proficient in drawing, painting, sculpture and other art, craft and Textiles Draw for a sustained period of time at their own level. design Use different media to achieve variations in line, texture, tone, Evaluate and analyse creative works using the language of art, craft 3D form and painting colour, shape and pattern. and design <u>Christmas Decorations – Textiles</u> Know about the great artists, craft makers and designers, and Develop skills in stitching, cutting and joining. understand the historical and cultural development of their art forms Experiment with a range of media e.g. overlapping, layering etc.

		 Clarice Cliff – 3D form and painting Join clay adequately and work reasonably independently. Use a developed colour vocabulary. Experiment with different effects and textures eg. blocking in colour, washes, thickened paint etc. Work confidently on a range of scales e.g. thin brush on small picture etc.
Year 4	Drawing	 Self Portraits – Drawing Explore relationships between line and tone, pattern and shape, line
	Painting	and texture. Roy Lichenstein Self-portrait – Painting
	Printing	 Make and match colours with increasing accuracy. Use more specific colour language e.g. tint, tone, shade, hue. Choose paints and implements appropriately. Show increasing independence and creativity with the painting process. John Constable Cloud Study – Painting Choose paints and implements appropriately. Plan and create different effects and textures with oil pastels Escher Printing Use block printing to create individual images and repeat patterns.
Year 5	Drawing	Oenone Hammersley – Drawing and Painting • Use a variety of source material for their work.
	Painting	Work in a sustained and independent way from observation

Work on preliminary studies to test media and materials Sculpture Rainforest animals – Sculpture Use recycled, natural and man-made materials to create sculpture. Textiles Plan a sculpture through drawing and other preparatory work. Printing Space Cross Stitch – Textiles • Use different grades and uses of threads and needles. • Extend their work within a specified technique. <u>Lino Printing – Printing</u> • Use different techniques, e.g the use of poly-blocks, relief, mono and resist printing. • Organise their work in terms of pattern, repetition, symmetry or random printing styles. Drawing The Eye – Drawing Year 6 Demonstrate a wide variety of ways to make different marks with dry and wet media. 3D Form

 Manipulate and experiment with the elements of art: line, tone, pattern, texture, form, space, colour and shape.

Sculptures - 3D Form

• Create sculpture and constructions with increasing independence.

MUSIC

Foundation Stage

During Foundation Stage, opportunities for the following are planned in:

As part of the Early Years learning environment, there are many opportunities for music as part of child-led play, whether singing songs, listening to music, dancing or playing instruments. This allows children to express their creativity and emotions, as well as reaching a deeper level of musical understanding.

As part of the Early Years learning environment, there are many opportunities for music, particularly through the 'Expressive Arts' area. There are opportunity to demonstrate how to play certain instruments, encouraging children to perform together as a group, starting to sing a familiar song and play an instrument, encouraging others to join in, clapping or tapping out a beat, providing lyrics to a song, using familiar, everyday objects to create new instruments and sounds, demonstrating how to use your body and voice as instruments, listening to music together and finding out about different music relating to customs and festivals that are important to the children

	Performing	Improvising and Composing	Listening and Reviewing	Dimensions*
KS1	Use their voices expressively and	Play tuned and untuned percussion	Listen with concentration and	Pitch: recognise and respond to high, low and
	creatively by singing songs and	instruments musically.	understanding to a range of high	middle sounds
	speaking chants and rhymes	Experiment with, create, select	quality live and recorded music	Duration : recognise and respond to a pulse and
	 Sing simple songs and 	and combine sounds using the	 Talk about music heard 	patterns of long and short sounds
	chants (with actions)	interrelated dimensions* of music	with appropriate	Dynamics: understand loud, quiet and silence
			vocabulary	Tempo: understand fast and slow

	building rhythmic and melodic memory Use voices to create sounds – humming, whispers, clicks and whistles Start and stop together on direction Begin to use correct technique when playing a range of percussion instruments Keep a steady beat and copy simple rhythmic patterns	 Create and clap own rhythms Create patterns of sound – long/short, high/low, loud/quiet Use instruments to reflect a topic or add sound effects to a story Invent symbols to represent sound and create a simple graphic score for pitch or duration that others can follow 	Begin to explore how music can affect emotions Recognise how music enriches our lives Compare two contrasting pieces of music for dimensions such as pitch or tempo Think of ways to improve their compositions	Timbre: identify different percussion sounds and how they are made Texture: recognise and respond to one sound leading to many sounds Structure: understand and identify beginning, middle and end and use of repetition and structure End points for KS1 To understand the meaning of the musical dimensions above To be able to copy a simple rhythm To be able to play tuned and untuned percussion with a degree of accuracy and control To enjoy taking part in singing To be able to articulate their responses to different music including the appropriate musical language
Lower KS2	Play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression • Sing rounds and partner songs (Y3 and 4) • Sing songs with a simple ostinato parts (Y3 and 4) • Sing with a developing understanding of expression and dynamics (both) • Perform simple rhythmic and melodic patterns on a variety of percussion instruments (both) • Read and play up to 3 notes on the recorder with	Improvise and compose music for a range of purposes using the interrelated dimensions* of music Use and understand staff and other musical notation Represent sounds on a graphic score with symbols for a group performance (Y3 Environment) Create a soundscape using tuned and untuned percussion (Y3 Environment) Compose 4 bars of music using 3 notes with an understanding of note value and time signature (Y4) Staff notation: recognise notes on the stave and	Listen with attention to detail and recall sounds with increasing aural memory Appreciate and understand a wide range of high quality live and recorded music drawn from different traditions and from great composers and musicians Develop an understanding of the history of music Recognise family groups within the orchestra and the importance of the conductor (Y4) Describe and give opinions of music heard with some use of musical vocabulary (Y4) Discuss the emotional impact of a piece (Y4)	Pitch: recognise and respond to higher and lower sounds and general shapes of a melody. Begin to recognise steps, leaps and repeated notes Duration: distinguish between a pulse and rhythm. Understand that rhythmic patterns fir to the beat. Begin to understand 4 metre rhythm patterns and syncopated patterns Dynamics: understand louder and quieter in finer graduations Tempo: understand getting faster and slower in finer graduations Timbre: identify a range of instruments by name and how they are played. Texture: recognise different combinations of layers in music Structure: develop an understanding of repetition (ostinato) and contrast (verse/chorus) and repeat signs.

note values of crotchet,

quaver and minim (Y4)

a degree of accuracy and

care (Y4)

Identify some of the

structural and expressive

Honor VS2		improvisation sessions with confidence (Y4)	 aspects of the music heard (Y4) Share ways to improve the composition of others (Y4) 	Ditable Identify stone loops and repeated notes
an exi dy Pla ins un 3 a syn Ac inc gro an (Y5 Re no gre inc e Pe	enfidently sing part songs d rounds with control, pression, phrasing and namics (both) asy percussion struments with an iderstanding of pitch, 2, and 4 metre and incopated rhythms (Y6) curately maintain an idependent part within a coup in both instrumental d vocal performance (5) and and play at least 5 intes on a recorder with eater accuracy and idependence (Y5) rform with control, namics and awareness others (Y5)	graphic score with symbols for group performance with an awareness of balance, tempo and dynamics (Y6) Improvise with confidence and an awareness of rhythm, context and purpose (Y5) Group soundscape composition with instruments and vocals and a conductor (Y6) Compose four bars of music using up to 5 notes with an understanding of note value and time signature and melody (Y5)	 Describe and give opinions of the music heard with confident use of an extended range of musical terminology (10 pieces) Listen to music of differing genres (e.g. jazz, blues, classical) and compare and contrast the different styles (10 pieces) Discuss ways to improve the composition of others using musical dimensions as a guide (Year 5 recorders) 	Pitch: Identify steps, leaps and repeated notes. Identify a major scale pattern and use pitch knowledge to recreate a piece on tuned percussion Duration: Understand 2, 3 and 4 metre rhythm patterns and recognise and use a syncopated rhythm Dynamics: understand how a wider range of dynamics can be used for expressive effect Tempo: understand how a wider range of tempi can be used for expressive effect Timbre: discuss the 'quality' of voice and instruments and families of instruments Texture: begin to understand different types of harmony Structure: develop an understanding of conventional musical structures (e.g. repeat signs, rondo, ostinato) End points for KS2 Read and play up to 5 notes on an instrument with a degree of accuracy Improvise/create own music using recorder, dood clarinet, percussion instruments or technology Know the four main groups of the orchestra (string, brass, woodwind and percussion) To enjoy taking part in singing and sing with a degree of control and expression To understand the meaning of the musical dimensions above To be able to articulate their responses to different music including the appropriate

musical language

DESIGN AND TECHNOLOGY

Foundation Stage

During Foundation Stage, opportunities for the following are planned through first-hand experiences. They will be encouraged to explore, observe, solve problems, think critically, make decisions and to talk about why they have made their decisions through the following opportunities:

Constructing: Learning to construct with a purpose in mind.

Structure and joins: For example making a structure out of small wooden bricks.

Using a range of tools: Whilst doing this, planning and adapting initial ideas to make them better.

Cooking techniques: Children will practice chopping, stirring, mixing, pouring and blending ingredients during cookery activities.

Exploration: Children will dismantle things and learn about how everyday objects work.

Discussion: Children will be given opportunities to discuss reasons that make activities safe or unsafe

As part of the Early Years learning environment, there are many opportunities for design and technology, particularly through the "Knowledge and Understanding of the World' area which includes wider opportunities in construction, sand, malleable play, sensory play, modelling and outdoor learning. These provide rich contexts to develop early design and technology skills.

	Topic	What the children are taught	NC Aims See medium term plans for these skills broken down into year groups
Year 1	Bird Feeder	Key Stage 1 Design	Develop the creative, technical and practical expertise needed to perform everyday tasks
	Food Technology Fruit Kebabs	 Design purposeful, functional, appealing products for themselves and other users based on design criteria Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication 	 confidently and to participate successfully in an increasingly technological world Build and apply a repertoire of knowledge, understanding and skills in order to design and
Year 2	Great fire of London Fire engines	technology Make	make high-quality prototypes and products for a wide range of users
	Food Technology Bread	 Select from and use a range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing] Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics Evaluate Explore and evaluate a range of existing products Evaluate their ideas and products against design criteria Technical knowledge 	 Critique, evaluate and test their ideas and products and the work of others Understand and apply the principles of nutrition and learn how to cook. suggest how their products could be improved

		 Build structures, exploring how they can be made stronger, stiffer and more stable Explore and use mechanisms [for example, levers, sliders, wheels and axles], in their products. Cooking and Nutrition Use the basic principles of a healthy and varied diet to prepare dishes Understand where food comes from 	
Year 3	Stone Age tools Roman Shields Food Technology Viking Sweet Style Pudding	 Key Stage 2 Design Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups 	 Develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world Build and apply a repertoire of knowledge,
Year 4	Electricity and Light	Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design	understanding and skills in order to design and make high-quality prototypes and products for a wide range of users
	Food Technology Greek salad	Make Select from and use a wider range of tools and equipment to perform practical tasks	Critique, evaluate and test their ideas and products and the work of others
Year 5	Egyptian Shadufs Levers and Pulleys	 [for example, cutting, shaping, joining and finishing], accurately Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional 	Understand and apply the principles of nutrition and learn how to cook.
	Food Technology Leek and Potato Soup /	properties and aesthetic qualities Evaluate	
	Potato Cheesy Bites	 Investigate and analyse a range of existing products Evaluate their ideas and products against their own design criteria and consider the 	
Year 6	Marble game	views of others to improve their work Understand how key events and individuals in design and technology have helped	
	Food Technology Vegetable Turn Over	shape the world Technical knowledge Apply their understanding of how to strengthen, stiffen and reinforce	
		 Food and Nutrition Understand and apply the principles of a healthy and varied diet Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed 	

PHYSICAL EDUCATION

Foundation Stage

During Foundation Stage, children will be given opportunity to develop skills in the following areas:

Personal, Social & Emotional Development
Self Regulation
Managing Self
Building Relationships

Physical Development Gross Motor Skills Fine Motor Skills

As part of the Early Years learning environment, there are many opportunities for PE, particularly through the 'Physical Development' area which includes opportunities to negotiate space and obstacles safely, with consideration for themselves and others; Demonstrate strength, balance and coordination when playing; Move energetically, such as running, jumping, dancing, hopping, skipping and climbing. Children are encouraged to confidently and safely use a range of large and small apparatus indoors and outside, alone and in a group and also develop overall body-strength, balance, co-ordination and agility through a range of activities.

	Unit	What the children are taught	NC Aims See schemes of work for these skills broken down into key stages
Year 1	Gymnastics – Flight; Points and Patches; Rock and Rolling; Wide, Narrowed, Circled Games – Developing Partner Work; Ball Skills; Throwing and Catching; Bat and Ball Dance - VS Unit 3 Handa's Surprise; Unit 4 Rainbow Fish; Unit 5 Bear Hunt Athletics – Leicestershire Scheme of Work Y1 Unit Gymnastics – High and Low; Pathways; Turning, Spinning/Twisting; Linking Movements Games – Throwing and Catching; Making Up Games; Dribbling, Kicking and Hitting; Group Games and Inventing Rules Dance VS Unit 3 Traditional tales Athletics - Leicestershire Scheme of Work Y2 Unit	 Master basic movements including running, jumping, throwing and catching, as well as developing balance, agility and co-ordination, and begin to apply these in a range of activities Participate in team games, developing simple tactics for attacking and defending Perform dances using simple movement patterns. 	 Develop competence to excel in a broad range of physical activities Are physically active for sustained periods of time Engage in competitive sports and activities Lead healthy, active lives.
Year 3	Gymnastics - Symmetry and Asymmetry; Pathways Games Invasion Games – netball and football; Striking and Fielding Games; Net/Court/Wall Games; Creative Games Dance VS Unit 1 Who am I?; Extreme Earth Swimming – Basic stroke technique and stamina Athletics - Leicestershire Scheme of Work Y3/4 Unit Gymnastics – Balance and Receiving Body Weight; Balance/change of direction and rolling	 Use running, jumping, throwing and catching in isolation and in combination Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending Develop flexibility, strength, technique, control and balance Perform dances using a range of movement patterns 	

	Games Invasion Games; Problem solving and inventing games; net/wall games; striking and fielding Dance - LCP Greek Olympics; Carnival of the Animals Athletics - Leicestershire Scheme of Work Y3/4 Unit	 Take part in outdoor and adventurous activity challenges both individually and within a team Compare their performances with previous ones and demonstrate improvement to achieve their personal best.
Year 5	Gymnastics - Bridges; Flight; Circuit training Games - Invasion Games – hockey and soccer, ball handling, striking and fielding, implementing and kicking Dance - LCP Rivers; Bangra Dancing Athletics - Leicestershire Scheme of Work Y5/6 Unit	
Year 6	Gymnastics - Working together; matching, mirroring and Counter- Balance and Counter-Tension Games - invasion games – football/basketball/ tag rugby; striking and fielding – rounders and cricket; Net and Wall - Tennis Dance - Synchronisation; WW2 Athletics - Leicestershire Scheme of Work Y5/6 Unit Outdoor and Adventurous – Team building/challenge	

COMPUTING

Foundation Stage

During Foundation Stage, children will be given opportunity to develop skills in the following areas:

As part of the Early Years learning environment, there are many opportunities for Computing, particularly through the 'Understanding the World' area which includes opportunities for young children to use technology to solve problems and produce creative outcomes. In particular, we provide opportunities for pupils to develop their ability to use computational thinking effectively.

	Unit	What the children are taught		NC Aims
			Se	ee medium term plans for these skills broken down into
				year groups
Year 1	Basic Computer Skills	To log onto a device		Key Stage 1
	Digital Media and Animation	To be safe, responsible and respectful online.	•	create and debug simple programs & use logical
	Presentation	To create pictures and text on documents		reasoning to predict the behaviour of simple programs
	E-Safety	To take photos and videos	•	use technology purposefully to create, organise, store,
				manipulate and retrieve digital content
		End Points Year 1:	•	recognise common uses of information technology
		Knows how to be safe, responsible and respectful online.		beyond school
		Knows to tell an adult when they see something unexpected or worrying online.	•	To use technology safely and respectfully

Year 2	Basic Computer Skills Research and the Internet Databases Programming E-Safety	Can press buttons in the correct order to follow a set of instructions Begin to use the word debug when correcting mistakes in programming. Use technology to collect information, including photos, video and sound. Use technology to create and present my ideas. Use the keyboard or a word bank on my device to enter text. Use links (Including favourites) to websites to find information. To log onto a device using personal log on To be safe, responsible and respectful online. To create pictures and text on documents and edit and save them To create a database To programme a device End Points Year 2: Know what kind of information should be kept to themselves when using the internet. Know what they should do if someone is mean to them online. Can verbalise the order to do things to make something happen and talk about this as an algorithm. Program a robot or software to do a particular task. Watch a program execute and spot where it goes wrong before beginning to debug it. Make and save a chart or graph using the data they collect Use technology to organise and present ideas in different ways. Save and open files on the device they use. Begin to understand that other people have created the information they use.	
Year 3	Basic Computer Skills Research and the Internet Presentation Programming E-Safety	 Knows how digital citizens take responsibility for themselves, their community and their world. Programme a sphero, reviewing and adjust instructions Create a google slide presentation embedding text, image and video Use a search engine Develop word processing skills End Points Year 3: Knows how a strong password can help to protect their privacy. Know that what they post online can affect their identity. Knows what they should do when someone uses mean or hurtful language online. Separates multi-step problems into smaller parts before debugging. Use the repeat commands successfully. Collect data over a short period of time that can help find the answers to a question. Combine a mixture of text, graphics and sound to share learning ideas. 	 Key Stage 2 design, write and debug programs that accomplish specific goals understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content collect, analyse, evaluate and present data and information

Year 4	Basic Computer Skills	Use an appropriate tool to share my work online. Use search tools to find and use an appropriate website. Understands whether images found online can be used in their own work.	use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.
Teal 4	Research and the Internet Databases & Spreadsheets Programming E-Safety	 Knows how their online activity affects the digital footprint of themselves and others. Programme a sphero, decomposing complex problems into simple steps. Create and format spreadsheets Validate research from websites Develop word processing skills 	
		End Points Year 4: Knows what information about themselves is ok to share online and understands why passwords need to be secure. Knows how their online activity affects the digital footprint of themselves and others Uses an efficient procedure to simplify a program. Understands the need to keep testing out programs whilst putting them together. Organise data in different ways. Choose the best, most efficient way to present data to others. Use photos, video and sound to create an atmosphere when presenting to different audiences. Use a keyboard confidently and make use of a spellchecker to write and review work. Identifies key words to use when searching and create a hyperlink to a resource	
Year 5	Basic Computer Skills Research and the Internet Digital Media & Animation Programming E-Safety	 Knows how their online activity affects the digital footprint of themselves and others. Develop knowledge of browsers and copyright of images Select use and combine different programmes and software to create a media presentation. Can programme a Sphero to follow multi-step instructions. End Points Year 5: Knows what Cyberbullying is and what they can do to stop it. Understands what the important parts of an online news article are. Refine a procedure using repeat commands to improve a program. Use 'if' and 'then' commands to select an action. Use logical reasoning to detect and debug Use a spreadsheet and database to collect and record data Present data in an appropriate way. Select use and combine different programmes and software to create a media presentation 	

		Select an appropriate online or offline tool to create and share ideas. Use different online communication tools for different purposes. Use a search engine to find appropriate information and check its reliability.
Year 6	Basic Computer Skills Research and the Internet Spreadsheets Presentation E-Safety	 Present work to a high standard using a selected programme Knows how their online activity affects the digital footprint of themselves and others. To use the internet safely to research a variety of topics Use basic formula in spreadsheets End Points Year 6: Knows how to communicate safely on the internet Understands the pros and cons of social media. Explain and program each of the steps in their algorithm. Recognise when I need to use a variable to achieve a required output. Check data collected or provided for accuracy and plausibility. Present data collected in an appropriate way. Combine a range of media, recognising the contribution of each to achieve a particular outcome. Be digitally discerning when evaluating the effectiveness of their own work and the work of others. Select an appropriate tool to communicate and collaborate online. Check the reliability of a website. Understands copyright and acknowledges the sources of information they use
		from online.

RELATIONSHIPS AND SEX EDUCATION (incorporating PSHE)

Foundation Stage

During Foundation Stage, children will be given opportunity to develop skills in the following areas:

As part of the Early Years learning environment, there are many opportunities for PSHE and RSE, particularly through the 'Personal, social, and emotional development' area which includes opportunities to link in with wellbeing – knowing who they are, where they fit in and feeling good about themselves. It also provides opportunity to develop respect for others, social competence and a positive disposition to learn.

Children will learn to form positive relationships in a setting that supports mutual respect and understanding and that celebrates and acknowledges differences. Children will be encouraged to gain a knowledge and understanding of their own culture and community to help them develop a sense of belonging and a strong self-image.

- Role play is used to help children explore their own culture and appreciate the similarities and differences in those of others.
- A positive self-image and high self-esteem will be encouraged to give children the confidence to make the most of opportunities, to communicate effectively and to explore the world around them.
- Children learn about different kinds of relationships. Being with the same adults and children regularly gives them the time and opportunity to develop relationships that promote social competence.
- Children will be encouraged to think about and practise ways of solving problems to build resilience and help them to feel capable of responding to challenges.

Year	Unit	What the children are taught	NC Aims
Group			See medium term plans for these skills broken
			down into year groups

In addition to the Year Group units, the areas below are ongoing:

Physical Health and Fitness: The importance of building regular exercise into daily and weekly routines and how to achieve this; for example, walking or cycling to school, a daily active mile or other forms of regular, vigorous exercise

Mental Health and Wellbeing: The benefits of physical exercise, time outdoors, community participation, voluntary and service-based activity, on mental wellbeing and happiness Being Safe: How to ask for advice or help for themselves or others and to keep trying until they are heard

Respectful Relationships: The conventions and courtesy of manners

The importance of respecting others, even when they are very different from them; that they can expect to be treated with respect by others, and that they in turn should show due respect to others, including those in positions of authority

Internet Safety and Harms: Through ongoing computing and safer internet practise, and Internet Safety Day: Why social media, some computer games and online gaming are age restricted

Health and Prevention – All classes regularly go over the importance of personal hygiene, the spread of germs and viruses and importance of handwashing.

Health and Prevention – We take the opportunity during vaccination times, to explore the need for immunisation provided through vaccination.

Basic First Aid is covered through the Year 5 First Aid Day and Year 6 visit The Safety Zone

Year 1	Beginning and Belonging	Creating a classroom where they can learn safely and happily	*Endpoints to reach by the end of KS 2
		 Building relationships within the classroom 	Families and People who care for me
		 Coping with new situations in school 	the characteristics of healthy family life,
		 Knowing how to find support 	that others' families, either in school or in the
			wider world, sometimes look different from
	Family and Friends	Developing friendship skills	their family
		Valuing difference	that marriage represents a formal and legally
		Families and other special people	recognised commitment of two people to each
		• Explore what sort of boundaries are appropriate in friendships with peers and	other which is intended to be lifelong.
		others	how to recognise if family relationships are
			making them feel unhappy or unsafe
	Managing risk	Knowing how to find support	Caring friendships
		Identify risky situations	
		Identify emotions associated with risks	
		- Identity emotions associated with risks	

	Safety contexts	 Understand strategies to use in risky situations Explore how to respond to adults they encounter whom they do not know Receiving and giving help Explore dangers posed by traffic, the sun, water and getting lost Identify characteristics of safe places to play Understand ways of preventing accidents 	 how important friendships are in making us feel happy and secure and the characteristics of friendships; how to recognise who to trust and who not to trust, how to judge when a friendship is making them feel unhappy or uncomfortable, managing conflict, how to manage these situations
	Relationships and Sex Education	Body knowledge Name for external parts of body including sexual parts Body functions and changes Examples of what our body can do e.g. skipping, writing and discuss favourite activities Body awareness and image -understand they have responsibility for their body's actions - understand their body belongs to them - things we do privately – toilet/changing - which parts of our body are private Personal hygiene How to keep themselves clean at home e.g. cleaning teeth - How to keep clean at school e.g. washing hands Illness and disease prevention	Respectful relationships The importance of respecting others, even when they are very different from them The conventions of courtesy and manners. The importance of self-respect and how this links to their own happiness About different types of bullying (including cyberbullying), the impact of bullying, responsibilities of bystanders and how to get help. What a stereotype is, and how stereotypes can be unfair, negative or destructive. The importance of permission-seeking and giving in relationships with friends, peers and adults. Online relationships That people sometimes behave differently online, including by pretending to be someone
Year 2	Personal Safety My emotions	How germs can enter the body and how to prevent Identify trusted adults Use the senses to help identify safe places to play Understand the need for a safety strategy Identify and name body parts including sexual parts Identify and distinguish between 'yes' and 'no' touches Recognise 'good' and 'bad' touches and tricks Assess risks to keep safe & Use assertive voice and body language Understand What, When, Who and How to tell Understand and manage feelings Know how to get support when they need it Understand and manage the impact of feelings Explore what 'relaxed' and 'calm' mean Explore assertiveness	 they are not. That the same principles apply to online relationships as to face-toface relationships, The rules and principles for keeping safe online How to critically consider their online friendships and sources of information How information and data is shared and used online. Being safe What sorts of boundaries are appropriate in friendships with peers and others About the concept of privacy The differences between appropriate and inappropriate or unsafe physical, and other contact.

	Drug Education Anti-Bullying	 Use a problem-solving process with help Explore what happens when substances such as food, drink and medicines enter the body Explore medicines and how all medicines are drugs, but not all drugs are medicine Explore how all drugs and all household substances are harmful if not used properly Explore how to avoid risky situations and influences and how to find support Defining bullying Explore causes and types of bullying Understand how bullying makes us feel Identify strategies and where to find support in school - it is essential that they discuss their feelings with a trusted adult to avoid isolation and loneliness Know how to respond if others are bullied Explore how a caring ethos is promoted in school, encouraging positive and safe relationships Understand that resorting to violence is never right 	 How to respond safely and appropriately to adults they may encounter (in all contexts, including online) whom they do not know. How to recognise and report feelings of being unsafe or feeling bad about any adult and how to report concerns or abuse, and the vocabulary and confidence needed to do so and where to get advice e.g. family, school and/or other sources.
	Relationships and Sex Education	The human life cycle - Humans have babies which turn into adults - Recognise baby animals and their parents - Understand our parents were once babies	
		Growing up Describe things they can know do that they couldn't when they were a baby Describe ways body changes as get older e.g. adult teeth, get taller Personal responsibilities Explain things they did as a baby e.g. cry, first words etc Describe responsibilities they know have e.g. setting table/folding clothes/ getting dressed How they can help others now older Parents Carers Families What does a parent have to do for a baby?	
Year 3	Family and Friends	 What does a baby need to stay happy and healthy? Developing friendship skills Valuing differences between ourselves and seeing things from different points of view 	

	Identifying people who are special to them	
	Explore how there are different patterns of family life	
	Refer to how marriage represents a formal and legally recognised commitment of	
	two people to each other which is intended to be lifelong	
	 Knowing how to find support and how to recognise if family relationships are 	
	making them feel unhappy or unsafe, and how to seek help or advice from others	
	if needed	
Healthy Lifestyles		
	 Understand what makes a healthy and balanced lifestyle - emphasise what constitutes a healthy diet including understanding calories and other nutritional 	
	content building from Year 2 Science and linking to Year 3	
	Understand the importance of healthy eating	
	Understand how dental hygiene contributes to a healthy lifestyle	
	Emphasise importance of sufficient good quality sleep for good health and that	
	lack of sleep can affect weight, mood and ability to learn	
	Emphasise the risks associated with an inactive lifestyle (including obesity)	
	How to recognise early signs of physical illness such as weight loss or unexpected	
	changes to the body	
	Reflect on their own lifestyles and take responsibility for making healthy choices	
	Ensure they know how and when to seek support including which adults to speak	
	to in school if they are worried about their health	
	the devetor of travels are attained as fourth in a good different forms including	
Anti-Bullying	 Understand key characteristics of bullying and different forms including cyberbullying 	
	Understand that resorting to violence is never right	
	Understand a range of reasons why bullying happens including when people do	
	not respect difference and diversity	
	 Understand how bullying affects us, reinforce how it can cause isolation and 	
	loneliness, so it is essential that they discuss their feeling with a trusted adult	
	Understand strategies for protection from bullying including responding	
	assertively	
	 Understand how to support others who are being bullied 	
	Identifying ways of making school a safer place where bullying is less likely to	
	happen	
Deletienski IC	The human lifecycle	
Relationships and Sex	- Main stages e.g. birth, baby, child, teenager etc	
Education	 Say what stage a person is at and describe differences in bodies at different stages 	
	- Say what stage a person is at and describe differences in bodies at different stages	
	Growing up	
	– What does grown up mean?	

		- How we feel about growing up	
		Porconal recognitibilities	
		Personal responsibilities - Understand adults and children have different responsibilities	
		- State a responsibility they'd like to take on	
		- State a responsibility they drike to take on	
		Parents Carers Families	
		 What do parents/carers have to do to care for babies? 	
		 What can children know do that they couldn't when a baby? 	
		How are parents/carers special?	
Year 4	Beginning and Belonging	Contributing to discussions about how to make a classroom where they can learn	
		safely and happily	
		Participate in activities which build collaborative relationships within their class	
		Recognise emotions involved in being in new situations in school	
		Know how to make new people welcome and what might be helpful for them in a	
		new situation	
		Identify sources of support and how they may also help others	
	My emotions	Understanding and managing an increasing range of emotions, both comfortable	
		and uncomfortable	
		Understanding and managing the impact of emotions	
		Think about their worries and strategies to deal with them, including seeking	
		support	
		Explore the impact of feelings on their actions and strategies for dealing with this	
		Recognise when they are becoming angry or upset and develop good calming	
		strategies	
		Explore how to act assertively	
		Use a problem-solving process without help sometimes	
	Drug Education	a Understand was about different times of during and have they enten the	
		Understand more about different types of drugs and how they enter the bloodstream	
		Develop understanding about essential use of medicines and basic safety rules	
		including storage	
		 Explore attitudes and beliefs about nicotine and alcohol, people who may use or 	
		misuse them and why	
		Understand how to act if harmful items are found	
		Begin to recognise a range of influences and ways of dealing with these	
	Relationships and Sex		
	Education	Body knowledge	
		 Use body part names e.g. penis, vagina, vulva, testicle, breast. 	

		Discuss differences between male and female body
		Body functions and change
		Name body parts and sort them into male only/ female only/ both
		 Describe appearance of a given person in a picture e.g. long legs, small hands etc
		Body awareness and image
		- Recognise each body is different e.g. hair colour, skin colour, foot size
		Understand our bodies are special because they are unique
		Personal hygiene
		Describe own personal hygiene routines e.g. changing underwear, washing hair,
		showering
		- Why do body parts need to be kept clean?
		Own responsibilities for personal hygiene and personal hygiene routines which an
		adult is responsible for
		 Responsibilities for personal hygiene they will take on in the future e.g. washing
		clothes/visiting dentist
		Illness/disease prevention
		- How germs get into the body
		- Actions we can take to prevent passing on germs
		Body functions and changes
		Name some changes to their body and opposite sex during puberty e.g. periods,
		voice breaking, pubic hair
Year 5	My emotions	Understanding and managing feelings, the impact they can have and explore
		strategies to help them cope
		Concentrate on individual emotions – boredom, worry and stress
		Use the 'problem-solving process' to help myself and others
		To be able to get support when it is needed Refer to how it is common for people to experience mental ill health. For many
		 Refer to how it is common for people to experience mental ill health. For many who do, the problems can be resolved if the right support is made available,
		especially if accessed early enough
		Build confidence and assertiveness
	Financial Capability	a. Evalore the history of manay trade and surrenaics
		 Explore the history of money, trade and currencies Explore a range of jobs, skills and pay and reasons for deductions on earnings
		Differentiate between essentials and desires
		2 S

	Know how to plan for the immediate and more distant future
	Focus on financial responsibility and feelings about money
Anti Bullying	Manage money in a real-life situation
	 Define bullying through comparing and contrasting different forms i.e. physical, verbal, indirect, cyberbullying Understand that resorting to violence is never right
	Understand personal factors or circumstances that may cause someone to engage in bullying or become a target
	 Understand the feelings of all those involved in bullying – those who are bullied, perpetrators, followers and bystanders
	 Understand strategies for responding to bullying including responding assertively Reinforce that it is essential that they discuss their feelings with a trusted adult, to avoid isolation and loneliness
Managing Change	Identify a range of situations which involve loss and change
	 Develop coping with emotions in loss and change situations Recognise a range of changes that occur during a lifetime and develop strategies for coping with future changes
Relationships and Sex	Body knowledge
Education	Name sexual parts of males and females seen outside the body
	Name sexual parts of males and females seen inside the body
	Acceptable words for sexual parts to use in class and which words can be
	rude/offensive
	Body functions and changes
	Understand that physical changes happen at different rates for different people
	Worries about puberty and how to cope with these
	Body awareness/images
	Describe why like a part of their body
	 How positive comments about appearance make people feel good
	Fashion/media influence/desire to look like friends
	Personal hygiene
	 Name personal hygiene products relevant to puberty
	 Name body parts to be washed daily during puberty

- Name some infectious diseases and ways they can be spread

Illness/disease prevention

		Europein have the common modern arranged of the Common Com
		Explain how they can reduce spread of common diseases
		 Describe how HIV can be stopped from spreading
		The human lifecycle
		Know the facts of the human lifecycle, including sexual intercourse
Year 6	Family and Friends	Identify who is in their network of special people
		 Understanding and valuing differences within individuals and families
		 Recognise some of the pressures on relationships and develop strategies to manage them
		Know how to access support
		Identify ways in which they already do or could support others - recognising if
		family relationships are making them feel unhappy or unsafe and how to seek help or advice
		Recognise and report feelings of being unsafe or feeling bad about any adult
		Explore what sort of boundaries are appropriate in friendships with peers and
		others
	Diversity and Communities	Explore their own identity and that of others
		 Understand aspects of the ethnic make-up of the local community and the
		national context
		Recognise negative effects of stereotyping and prejudice
		Recognise the different communities they belong to
		 Know about the role of the media and how it can influence them and their community
		Explore caring for the environment, animals and plants
	Drug Education	 Explore drug types and effects including medicines (prescribed and over the counter) legal recreational and illegal
		 Understand the role of medicines in promoting, improving and sustaining health
		Develop their knowledge, understanding and attitudes relating to alcohol,
		cigarettes, solvents and their effects, risks and consequences
		Begin to learn about the law relating to the use and misuse of legal and illegal
		drugs
		Recognise a range of risky situations relating to drugs and substances and know
		where to find further information and advice
	Safety Context	Talk about situations where staying safe is important
		Identify safety issues when cycling
		Identify ways to stay safe in the sun and have strategies to keep themselves safe

	 Identify a wider range of risky situations and have realistic strategies for staying safe e.g. railway line Understand the rules for keeping people safe in school
	onderstand the rates for Records Series and in serious
Relationships and Sex	Understand how to prevent a wider range of accidents
Education	The Human Lifecycle
	- What happens at a human birth
	Growing up
	 What they are looking forward to/not looking forward to about becoming a
	teenager/adult
	Personal responsibilities
	 Their responsibilities for the feelings/wellbeing of others
	Parents Carers Families
	 Understand there are different types of love
	 Special ways people 'in love' might behave
	- The need for trust, love and commitment in adult marriage/established
	relationships
	 How commitment can be shown
	Why people who are in love may choose to have a baby
	 Understand and respect a wide range of family relationships e.g. same sex
	partners, extended families, fostering, second marriages etc

Foundation Stage

During Foundation Stage, children will be given opportunities to ask questions and explore answers which can:

- support children to develop emotionally, spiritually and morally
- support their developing thinking skills, both abstract and imaginative
- help them find out about themselves, their family and community
- help them to develop a sense of place in their family and community, in the world and in the universe
- help them learn about similarities and differences between themselves and others, and among families, communities and traditions

The children have opportunities to explore: why are stories special and why?; Which places are special and why?; Where do we belong?

As part of the Early Years learning environment, there are many opportunities for RE, particularly through the 'Understanding the World' area which includes opportunities to find out about others and reflect on belief, culture and practice and explore faith through:

- stories
- visuals photos, pictures
- toys and puppets
- handling real artefacts
- role-play
- creativity dance, drama, art and design
- non-fiction books
- discussion

	Unit	What the children are taught?	SACRE Aims See the Agreed Syllabus medium term plans for these skills broken down into year groups
Year 1	What do Christians believe God is like?	Make sense of belief: Identify what a parable is; Tell the story of the Lost Son from the Bible simply and recognise a link with the Christian idea of God as a forgiving Father; Give clear, simple accounts of what the story means to Christians Understand the impact: Give at least two examples of a way in which Christians show their belief in God as loving and forgiving; Give an example of how Christians put their beliefs into practice in worship Make connections: Think, talk and ask questions about whether they can learn anything from the story for themselves, exploring different ideas	Believing Know about and understand a range of religions and worldviews, so that they can: • describe, explain and analyse beliefs and practices, recognising the diversity which exists within and between communities and amongst individuals • identify, investigate and respond to questions posed, and responses offered by some of the sources of wisdom found in religions and worldviews • appreciate and appraise the nature, significance and
	Who do Christians say made the world?	Make sense of belief: Retell the story of creation from Genesis; Recognise that 'Creation' is the beginning of the 'big story' of the Bible; Say what the story tells Christians about God, Creation and the world	impact of different ways of life and ways of expressing meaning.

	Why Does Easter Matter to Christians? How should we care for others and the world and why does it matter?	Understand the impact: Give at least one example of what Christians do to say 'thank you' to God for Creation Make connections: Think, talk and ask questions about living in an amazing world; Give a reason for the ideas they have and the connections they make between the Jewish/Christian Creation story and the world they live in. Make sense of belief: Recognise that Incarnation and Salvation are part of a 'big story' of the Bible; Tell stories of Holy Week and Easter from the Bible and recognise a link with the idea of Salvation Understand the impact: Give at least three examples of how Christians show their beliefs about Jesus' death and resurrection in church worship at Easter Make connections: Think, talk and ask questions about whether the story of Easter only has something to say to Christians, or if it has anything to say to pupils about sadness, hope or heaven, exploring different ideas and giving a good reason for their ideas Make sense of belief: Identify a story or text that says something about each person being unique and valuable; Give an example of a key belief some people find in one of these stories; Give a clear, simple account of what Genesis 1 tells Christians and Jews about the natural world Understand the impact: Give an example of how people show that they care for others, making a link to one of the stories; Give examples of how Christians and Jews can show care for the natural earth; Say why Christians and Jews might look after the natural world Make connections: Think, talk and ask questions about what difference believing in God makes to how people treat each other and the natural world; Give good reasons why everyone should care for others and look after the natural world.	Expressing Express ideas and insights about the nature, significance and impact of religions and worldviews, so that they can: • explain reasonably their ideas about how beliefs, practices and forms of expression influence individuals and communities • express with increasing discernment their personal reflections and critical responses to questions and teachings about identity, diversity, meaning and value, including ethical issues • appreciate and appraise varied dimensions of religion. Living Gain and deploy the skills needed to engage seriously with religions and worldviews, so that they can: • find out about and investigate key concepts and questions of belonging, meaning, purpose and truth, responding creatively • enquire into what enables different individuals and communities to live together respectfully for the wellbeing of all • articulate beliefs, values and commitments clearly in order to explain why they may be important in their own and other people's lives
Year 2	What does it mean to belong to a faith community?	Make sense of beliefs: Recognise that loving others is important in lots of communities; Say simply what Jesus and one other religious leader taught about loving other people Understand the impact: Give an account of what happens at a traditional Christian and Jewish or Muslim welcome ceremony, and suggest what the actions and symbols mean; Identify at least two ways people show they love each other and belong to each other when they get married; Make connections: Give examples of ways in which people express their identity and belonging within faith communities and other communities, responding sensitively to differences Talk about what they think is good about being in a community, for people in faith communities and for themselves, giving a good reason for their ideas.	

	Who is a Muslim and how do they live?	Make sense of belief: Recognise the words of the Shahadah and that it is very important for Muslims; Identify some of the key Muslim beliefs about God found in the Shahadah and the 99 names of Allah, and give a simple description of what some of them mean; Give examples of how stories about the Prophet show what Muslims believe about Muhammad Understand the impact: Give examples of how Muslims use the Shahadah to show what matters to them; Give examples of how Muslims use stories about the Prophet to guide their beliefs and actions; Give examples of how Muslims put their beliefs about prayer into action Make connections: Talk about and ask questions about Muslim beliefs and ways of living; Talk about what they think is good for Muslims about prayer, respect, celebration and self-control, giving a good reason for their ideas; Give a good reason for their ideas about whether prayer, respect, celebration and self-control have something to say to them too.	
	What makes some places sacred to believers?	Make sense of belief: Recognise that there are special places where people go to worship, and talk about what people do there; Identify at least three objects used in worship in two religions and give a simple account of how they are used and something about what they mean; Identify a belief about worship and a belief about God, connecting these beliefs simply to a place of worship Understand the impact: Give examples of stories, objects, symbols and actions used in churches, mosques and/or synagogues which show what people believe; Give simple examples of how people worship at a church, mosque or synagogue; Talk about why some people like to belong to a sacred building or a community Make connections: Think, talk and ask good questions about what happens in a church, synagogue or mosque, saying what they think about these questions, giving good reasons for their ideas; Talk about what makes some places special to people, and what the difference is between religious and non-religious special places.	
Year 3	Why do people pray?	Describe the practice of prayer in the religions studied; Make connections between what people believe about prayer and what they do when they pray; Describe ways in which prayer can comfort and challenge believers; Describe and comment on similarities and differences between how Christians, Muslims and Hindus pray	
	Why is Jesus inspiring to some people?	Make connections between some of Jesus' teachings and the way Christians live today; Describe how Christians celebrate Holy Week and Easter Sunday; Identify the most important parts of Easter for Christians and say why they are important; Give simple definitions of some key Christian terms and illustrate them with events from Holy Week and Easter	
	What can we learn from religions about	Give examples of rules for living from religions and suggest ways in which they might help believers with difficult decisions; Make connections between stories of temptation and why people can find it difficult to be good; Give examples of ways in which some inspirational	

	dociding what is right	people have been guided by their religion; Discuss their own and others' ideas about how	
	deciding what is right	1	
V	and wrong?	people decide right and wrong	
Year	Why are festivals	Make links between beliefs about Jesus and the celebration of Easter; Make links between	
4	important to religious communities?	the symbols used by churches and Christians in holy week and the celebration of Easter;	
	communities:	Make links between the symbols on a seder plate and their meaning; Make links between	
		the story of Lakshmi and practices at Divali; Suggest what matters most to believers at	
		Easter/Id ul Fitr/Divali/Pesach; Identify similarities and differences between the way two	
		Christian denominations celebrate Easter; Identify similarities and differences between the celebration of two festivals; Identify some of the celebrations that form a part of my own	
		life; Make links between things that are important in our community and celebrations that	
		are held or could be held	
		are field of could be field	
		Understand the impact:	
	What does it mean to	Describe how Hindus show their faith within their families in Britain today; Describe how	
	be a Hindu in Britain	Hindus show their faith within their faith communities in Britain today; Identify some	
	today?	different ways in which Hindus show their faith	
	,	Make sense of belief:	
		Identify the terms dharma, Sanatan Dharma and Hinduism and say what they mean; Make	
		links between Hindu practices and the idea that Hinduism is a whole 'way of life' (dharma)	
		Make connections:	
		Raise questions and suggest answers about what is good about being a Hindu in Britain	
		today, and whether taking part in family and community rituals is a good thing for individuals	
		and society, giving good reasons for their ideas.	
		Make sense of belief:	
		Identify some beliefs about love, commitment and promises in two religious traditions and	
		describe what they mean; Offer informed suggestions about the meaning and importance of	
	114/1	ceremonies of commitment for religious and non-religious people today	
	How and Why do	Understand the impact:	
	some people mark	Describe what happens in ceremonies of commitment and say what these rituals mean;	
	the significant events of life?	Make simple links between beliefs about love and commitment and how people in at least	
	of file:	two religious traditions live; Identify some differences in how people celebrate commitment Make connections:	
		Raise questions and suggest answers about whether it is good for everyone to see life as a	
		journey, and to mark the milestones; Make links between ideas of love, commitment and	
Year	What does it mean to	Make sense of belief:	
5	be a Muslim in Britain		
		ways in which Muslim sources of authority guide Muslim living	
	,	Understand the impact:	
	What does it mean to be a Muslim in Britain today?	promises in religious and non-religious ceremonies; Give good reasons why they think ceremonies of commitment are or are not valuable today. Make sense of belief: Identify and explain Muslim beliefs about God, the Prophet* and the Holy Qur'an; Describe ways in which Muslim sources of authority guide Muslim living	

		,	
		Make clear connections between Muslim beliefs and ibadah; Give evidence and examples to show how Muslims put their beliefs into practice in different ways Make connections: Make connections between Muslim beliefs studied and Muslim ways of living in Britain/ Leicestershire today; Consider and weigh up the value of e.g. submission, obedience, generosity, self-control and worship in the lives of Muslims today and articulate responses on how far they are valuable to people who are not Muslims; Reflect on and articulate what it is like to be a Muslim in Britain today, giving good reasons for their views.	
	Why do some people believe in God and some people not?	Make sense of belief: Define the terms 'theist', 'atheist' and 'agnostic' and give examples of statements that reflect these beliefs; Identify and explain what religious and non-religious people believe about God, saying where they get their ideas from; Give examples of reasons why people do or do not believe in God	
		Understand the impact: Make clear connections between what people believe about God and the impact of this belief on how they live; Give evidence and examples to show how Christians sometimes disagree about what God is like Make connections: Reflect on and articulate some ways in which believing in God is valuable in the lives of believers, and ways it can be challenging; Consider and weigh up different views on theism, agnosticism and atheism, expressing insights of their own about why people believe in God or not; Make connections between belief and behaviour in their own lives, in the light of their learning.	
	Why is the Torah important to Jewish people?	Make sense of belief: Identify and explain Jewish beliefs about God; Give examples of some texts that say what God is like and explain how Jewish people interpret them Understand the impact: Make clear connections between Jewish beliefs about the Torah and how they use and treat it; Make clear connections between Jewish commandments and how Jews live; Give evidence and examples to show how Jewish people put their beliefs into practice in different ways Make connections: Make connections between Jewish beliefs studied and explain how and why they are important to Jewish people today; Consider and weigh up the value of e.g. tradition, ritual,	
Year	How do Christians	community, study and worship in the lives of Jews today, and articulate responses on how far they are valuable to people who are not Jewish. Make sense of belief:	
6	decide how to live - What would Jesus do?	Identify features of Gospel texts; Taking account of the context, suggest meanings of Gospel texts studied, and compare their own ideas with ways in which Christians interpret biblical texts Understand the impact:	

Make clear connections between Gospel texts, Jesus' 'good news', and how Christians live in the Christian community and in their individual lives Make connections: Make connections between Christian teachings and the issues, problems and opportunities in the world today, including their own lives; Articulate their own responses to the issues studied, recognising different points of view How does faith help Make sense of belief: when life gets hard? Describe at least three examples of ways in which religions guide people in how to respond to good and hard times in life; Identify beliefs about life after death in at least two religious traditions, comparing and explaining similarities and differences **Understand the impact:** Make clear connections between what people believe about God and how they respond to challenges in life; Give examples of ways in which beliefs about resurrection/ judgement/heaven/karma/reincarnation make a difference to how someone lives Make connections: Interpret a range of artistic expressions of afterlife, offering and explaining different ways of understanding these; Offer a reasoned response to the unit question, with evidence and example, expressing insights of their own. Make sense of belief: Identify what type of text some Christians say Genesis 1 is, and its purpose; Taking account of the context, suggest what Genesis 1 might mean, and compare their ideas with ways in Creation and Science: which Christians interpret it, showing awareness of different interpretations Conflicting or **Understand the impact:** Complementary? Make clear connections between Genesis 1 and Christian belief about God as Creator; Show understanding of why many Christians find science and faith go together Make connections:

Identify key ideas arising from their study of Genesis 1 and comment on how far these are helpful or inspiring, justifying their responses; Weigh up how far the Genesis 1 creation narrative is in conflict, or is complementary, with a scientific account, giving good reasons for their views

FRENCH

	What the children are taught	NC Aims See medium term plans for these skills broken down into year groups
Year 3	 Listen attentively to spoken language and show understanding by joining in and responding Explore the patterns and sounds of language through songs and rhymes and link the spelling, sound and meaning of words 	To understand and communicate ideas, facts and feelings in speech and writing, focused on familiar and routine matters, using their knowledge of phonology, grammatical structures and vocabulary.
Year 4	 Appreciate stories, songs, poems and rhymes in the language Listen attentively to spoken language and show understanding by joining in and responding Develop accurate pronunciation and intonation so that others understand when they are reading aloud or using familiar words and phrases 	order. Improving letter and sound links. Year 6 – Initiating and manipulating language Consolidating understanding
Year 5	 Listen attentively to spoken language and show understanding by joining in and responding Speak in sentences, using familiar vocabulary, phrases and basic language structures Present ideas and information orally to a range of audiences Engage in conversations; ask and answer questions; express opinions and respond to those of others; seek clarification and help Read carefully and show understanding of words, phrases and simple writing Broaden their vocabulary and develop their ability to understand new words Understand basic grammar 	
Year 6	 Listen attentively to spoken language and show understanding by joining in and responding Engage in conversations; ask and answer questions; express opinions and respond to those of others; seek clarification and help Write phrases from memory, and adapt these to create new sentences, to express ideas clearly Describe people, places, things and actions orally and in writing
